The 59th Annual Conference of ISACON Delhi Chapter - 1st Virtual Conference

Greetings from Team ISACON2020

The 59th Annual Conference of ISACON Delhi Branch was scheduled in April this year. The venue, ~~Marriott~~, was booked, scientific programme was finalized and the preparation was on full swing when complete lockdown was announced by the Government due to outbreak of Covid-19. The conference was proposed to be cancelled and it was decided that the money paid by delegates would be refunded.

However, Dr Anil Kumar Jain, the organizing chairperson and ex-president ISA Delhi, along with present ISA Delhi office bearers and GC member Dr Rajiv Gupta decided to conduct the annual conference virtually. Initially we were skeptical and not sure how to conduct virtual conference, with multiple halls, for 3 days. Thanks to our audiovisual team, we learnt the technicalities. Organizing an event like this during these times was tough as half of our department was busy managing Covid ICUs and increasing OT list in non-Covid OTs. This gave us limited manpower and time to manage. But with constant motivation from Dr. Anil Kumar Jain & guidance from Dr J. ~~Sood~~, we managed to conduct the 1st Virtual Annual Conference of ISA Delhi.

We were overwhelmed by the response shown by our delegates. Initially we had planned only one session of free paper in one of the 2 halls. But thanks to technology, delegates from outside NCR like ~~Uttar~~, Karnataka, ~~Andhra~~ and ~~Tamil~~ registered and sent abstracts for free paper & e-poster presentation.

We had 4 halls running simultaneously for 3 days with one hall dedicated for free paper presentation and one hall for e-poster presentation.

We had approximately 420 registered delegates and while around 600 participants attended the conference each day. It was available live on YouTube as well.

We would like to thank our secretarial team for working tirelessly and meticulously.

The award of various competitions - Quiz, TN Jha paper presentations, ~~Best~~ papers and E-posters are as follows:

Quiz competition

Team: Dr Gouri Mishra, Dr Gokhale & Dr Yashini, VMHC & SJH

TN Jha paper presentation:

1st Dr Prashant HT, MAMC

2nd Dr. Archana K.P, MAMC

ISACON Delhi (Virtual Conference)
Heartiest Congratulations to Dr. Rajiv Gupta,

ISA National World Anaesthesia Day Celebrations

First Ever Combined Celebration of All ISA Branches (online)

Date: 16th October 2020 (Friday) | Time: 4:00 PM - 8:00 PM

Highlights

- Address by Special Invitees from WFSA, ILCOR, European & UK Resuscitation Council
- ISA Showcase from all ISA State Branches
- World Restart A Heart Day Celebrations
- Indian Resuscitation Council Stamp release
- ISA Public Awareness Flier release
- ISA Calendar of Events release
- ISA Fit Anaesthesiologist Campaign Video release
- ISA Cultural Club Events
- ISA Leadership Summit Essay Competition
- Preliminary Results of ISA CIAT Survey
- IJA, ISA FBF, ISA PPF, YUVA ISA, ISA Art & Literary Club activities, etc.

All ISAIans are cordially invited.

Dr. Muralidhar Joshi
President ISA National

Dr. Naveen Malhotra
Honorary Secretary ISA National

Indian J Anaesth [serial online] 2020 [cited 2020 Oct 13];64:556-84. Available from: <https://www.ijaweb.org/text.asp?2020/64/7/556/288764>

ISA PRACTICE GUIDELINES 2020
Heartiest Congratulations to Dr. S Bala Bhaskar,
Chairman ISA Guidelines Committee
(16 October 2020)

SUMMARY OF RECOMMENDATIONS

Recommendations	Level of Recommendation (GRADE)
Adult Section	
Clear liquids should be allowed up to 2 h prior to administration of sedation or anaesthesia.	Strong
The volume of clear liquid consumed may be restricted to < 450mL, 2 h prior to administration of sedation or anaesthesia.	Weak
Non-clear liquids may be allowed up to 4 h prior to administration of sedation or anaesthesia.	Weak
Light meals may be allowed up to 6 h prior to administration of sedation or anaesthesia.	Weak
If the patient has consumed heavy meals, it may be prudent to wait for at least 10 h prior to administration of sedation or anaesthesia.	Weak
Heavy meal consumption is not advisable the night prior to surgery.	Strong
Routine use of aspiration prophylaxis in adequately fasted patients is not advised prior to administration of sedation or anaesthesia.	Strong
Aspiration prophylaxis is advised in high risk patients as identified by the anaesthesiologist.	Weak
H2 receptor blockers, proton pump inhibitors and prokinetic drugs may be used as prophylaxis in high risk patients.	Weak
Obstetric Section	
Women in early or late pregnancy when administered sedation or anaesthesia may be considered to be at high risk for aspiration.	Weak
Clear liquids may be allowed up to 2 h prior to administration of sedation or anaesthesia in pregnant women.	Weak
Non-clear liquids may be allowed up to 4 h prior to administration of sedation or anaesthesia in pregnant women.	Weak
Light meals may be allowed up to 6 h prior to administration of sedation or anaesthesia in pregnant women.	Weak
If the pregnant woman has consumed a heavy meal, it may be prudent to wait for at least 10 h prior to administration of sedation or anaesthesia.	Weak
Heavy meal consumption is not advisable the night prior to surgery in pregnant women.	Strong
Pregnant women requiring sedation or anaesthesia should be administered aspiration prophylaxis.	Strong
H2 receptor blockers, proton pump inhibitors either alone or in combination with prokinetic drugs can be administered for aspiration prophylaxis.	Weak
Clear liquids can be allowed orally 8 h after caesarean section under regional/ general anaesthesia.	Strong

ISA PRACTICE GUIDELINES 2020
Heartiest Congratulations to Dr S Bala Bhaskar,
Chairman ISA Guidelines Committee
(16 October 2020)

SUMMARY OF RECOMMENDATIONS

Recommendations	Level of Recommendation (GRADE)
Paediatric Section	
Consumption of water, up to 3mL/kg should be allowed until 1 h prior to administration of anaesthesia.	Strong
Consumption of clear liquids other than water, up to 3 mL/kg can be allowed until 2 h prior to administration of anaesthesia.	Weak
Human milk and fully skimmed non-human milk can be allowed until 4 h prior to administration of anaesthesia.	Weak
Non-clear liquids, non-human milk, formula feeds, light breakfast or light meal may be allowed until 6 h prior to administration of anaesthesia.	Weak
The attending anaesthesiologist can decide for or against the administration of aspiration prophylaxis in adequately fasted children.	Weak
The attending anaesthesiologist can decide on the duration of fasting for procedural sedation within operating room or at remote location.	Weak
The oral consumption of clear liquids in the postoperative period should be resumed at the earliest where no medical or surgical contraindications exist.	Strong
Bariatric Section	
Obese individuals may be considered to be at higher risk for aspiration in comparison to non-obese individuals when administered sedation or general anaesthesia.	Weak
In obese individuals, the advice on preoperative fasting practices may be the same as in non-obese individuals prior to the administration of sedation or anaesthesia.	Weak
Aspiration prophylaxis may be administered in obese patients prior to the administration of sedation or anaesthesia.	Weak
H2 receptor blockers, proton pump inhibitors either alone or in combination with prokinetic drugs can be administered for aspiration prophylaxis.	Weak
Gastric Ultrasonography Section	
Gastric ultrasonography may be used as a bedside tool for assessing the quality and quantity of gastric contents in the preoperative period.	Weak
The quality and quantity of gastric contents should be assessed in the right lateral decubitus position.	Strong

1. All volumes mentioned in brackets are with respect to adult patients only.
2. Volumes of clear liquid are taken as <450 mL unless specifically mentioned.

ISA PRACTICE GUIDELINES 2020
Heartiest Congratulations to Dr S Bala Bhaskar,
Chairman ISA Guidelines Committee
(16 October 2020)

Know your Anaesthesiologist

1. Anaesthesiologist is the specialist doctor who makes your surgery pain free and keeps you safe and comfortable during surgery.
2. Anaesthesiologist is qualified and trained just like your surgeon or gynecologist/obstetrician.
3. Anaesthesiologist administers medications including blood transfusion, and monitors your breathing, heart rate, blood pressure, consciousness and other organ functions during your surgery.
4. Your anaesthesiologist will examine you before your surgery and help you allay your anaesthesia concerns and anxiety.
5. Your anaesthesiologist decides in consultation with your surgeon and yourself, the best anaesthesia technique for your surgery.
6. Your anaesthesiologist takes care of you before and during your surgery, and until you are awake, comfortable and safely recovered from anaesthesia.
7. Anaesthesiologist have expertise in emergency resuscitation, Intensive Care Unit (I.C.U.), disaster management.
8. Anaesthesiologist, in addition, takes care of you for other interventions requiring pain relief or sedation outside the operation theatre such as in painless childbirth, CT, MRI, Angioplasty and Endoscopy.
9. Anaesthesiologist also takes care of you in the 'Pain Clinic' for relief of immediate and long-term pain due to surgery, trauma, nerves, muscles, joints, cancer and other painful conditions.

ISA PUBLIC AWARENESS FLIER

Thank You Dr. Meena Cherian, Dr. Jyotsna Agarwal
(16 October 2020)

**ISA**
Indian Society of
Anaesthesiologists**Know about Anaesthesia**

1. You will require 'Anaesthesia' for a pain free and safe surgery. Various anaesthesia techniques can be used depending on your surgical procedure.
2. You can participate in your own safety by cooperating with your anaesthesiologist and following their instructions carefully:
 - i. Tell about your coexisting illnesses, smoking, alcohol, medications, allergies, medical history and investigations.
 - ii. Tell if you are pregnant or breastfeeding.
 - iii. Follow your fasting and medication orders strictly.
3. You will have an intravenous cannula inserted before your anaesthesia.
4. Your anaesthesia technique could be any one or combination of the following:
 - i. Local anaesthesia makes the surgical area numb. In this you have the choice to stay awake or sleep with medication.
 - ii. Regional anesthesia blocks the nerves to make a particular region numb and is given by an injection in the back or in the limb. In this you have the choice to stay awake or sleep with medication.
 - iii. General anaesthesia makes you unconscious with medicines and may require a breathing tube in your throat. In this you will gain consciousness soon after surgery, except under certain situations.
5. You will be taken care of by your anaesthesiology team and monitored until you are awake and safely recovered from anaesthesia.
6. Anaesthesia is very safe but all procedures can have some risks. Talk to your anaesthesiologist about your concerns.
7. You must understand about your anaesthesia technique before you give your consent. This is important for us and for your own safety.

विश्व निश्चेतना दिवस विशेष

‘मरीज की मुस्कान देती है काम की संतुष्टि’

पत्रिका न्यूज नेटवर्क
patrika.com

अजमेर, कोविड-19 काल में मानवजाति के लिए स्वास्थ्य संरक्षक बनकर डटे एनेस्थीसियोलॉजिस्ट को लेकर जनमानस की धारणा बदल गई है। एनेस्थीस्ट सिर्फ ऑपरेशन के दौरान मरीजों को बेहोश करने और दर्दरहित दवा के लिए ही याद नहीं किए जाते, सच्चाई यह है कि वे अपनी जान जोखिम में

बढ़ सकती है जेएलएन में सीटों की संख्या

जवाहरलाल नेहरू आयुर्विज्ञान महाविद्यालय में भी गत दस वर्ष पहले जहां चार विद्यार्थी ही, हर वर्ष प्रशिक्षित होते वहीं यह संख्या आज बढ़ कर 16 प्रतिवर्ष हो गई है। और आगे चलकर आवश्यकता को देखते हुए जल्द ही 22 किए जाने की सम्भावना है।

डाल कर मरीज की मुस्कान में ही अब अपने काम की संतुष्टि तलाशते हैं।

जवाहरलाल नेहरू आयुर्विज्ञान महाविद्यालय एवं चिकित्सालय की एनेस्थीसियोलॉजिस्ट प्रो. पूजा (रावत) याधुर ने शुक्रवार को विश्व निश्चेतना दिवस आयोजित परिचर्चा में यह बात कही। डॉ. पूजा ने कहा कि एक एनेस्थीस्ट का कार्यक्षेत्र जनमानस की धारणा से कहीं अधिक व्यापक है। वस्तुतः एनेस्थीस्ट का कार्य रोगी के अस्पताल में भर्ती होने से शुरू

होकर जब तक वह पूर्णतः स्वास्थ्य लाभ नहीं कर लेता तब तक होता है। ऑपरेशन के दौरान भी और उसके बाद भी। हॉस्पिटल में भर्ती गंभीर मरीजों को ऑक्सीजन थैरेपी देनी हो या सांस की नली डाल कर वेंटिलेटर सपोर्ट पड़ना हो रोगियों के जीवनरक्षण की जिम्मेदारी एनेस्थीसियोलॉजिस्ट जैसे गुमनाम योद्धाओं की होती है। मितल हॉस्पिटल एड रिसर्च सेंटर अजमेर के एनेस्थीसियोलॉजिस्ट डॉ. राजीव पाण्डे ने कहा कि कोविड-19 के रोगी का मनोबल हर स्थिति में उच्च बना रहे।

ISA National CIAT Survey

CIAT- COVID ICU Anaesthesia Team

This Survey is being conducted by Indian Society of Anaesthesiologists (ISA National) to collect the details of Anaesthesiologists working in different COVID Areas and doing actual on field COVID duties wearing PPE. This survey can be filled by all Anaesthesiologists involved in COVID Care. Senior Members of the Department/ Hospital are requested for special inputs. Confidentiality will be maintained, at all cost.

SEC/ISA NHQ/RTK/2020/668
Dated: 07-12-2020

To
The President and Secretary,
ISA State and City Branches.

Subject: ISA endorses and supports the protest by IMA for withdrawal of CCIM notification allowing Ayurveda doctors to practice modern surgical procedures, and also NITI Aayog committees for integration of all systems of medicine.

Dear ISAians,
Greetings from ISA National Head Quarters!

Indian Society of Anaesthesiologists (ISA) strongly endorses and supports the protest by Indian Medical Association (IMA) for withdrawal of CCIM notification allowing Ayurveda surgery post graduates to learn and practice modern surgical procedures and techniques.

Indian Society of Anaesthesiologists strongly opposes administration of Anaesthesia by the Ayurveda Doctors and the course of MD (Ayd) Anaesthesia & Diploma (Ayd) Anaesthesia. Such practice and courses (Ayurveda) in the highly specialized and skilful field of Anaesthesiology is against the basic human right of safe anaesthesia.

ISA also supports IMA in the protest against the NITI Aayog committees on medical education, practice, public health administration and research to officially mix all systems of medicine.

All the members of Indian Society of Anaesthesiologists are requested to support Indian Medical Association in this protest at City, State and National Level.

Thank You.
Best wishes and regards,

Muralidhar Joshi
